

The BISCIT Story

BISCIT, a pioneer in enterprise resource planning (ERP) innovation, specializes in integrating with Epicor Kinetic ERP to enhance business efficiency. Founded in 2002 by Greg Hyslop, the company has evolved from a technology partner to a leader in developing innovative ERP solutions. Its product suite, including Epicor Kinetic Warehouse, Dispatch for Kinetic and Proof of Delivery, is designed to transform your warehouse and shop floor operations for a new era of productivity and efficiency gains. Globally recognized for its expertise, BISCIT's journey underscores a commitment to revolutionizing businesses with intelligent software.

Sign on glass delivery tracking

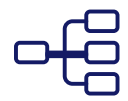

Epicor Kinetic Warehouse

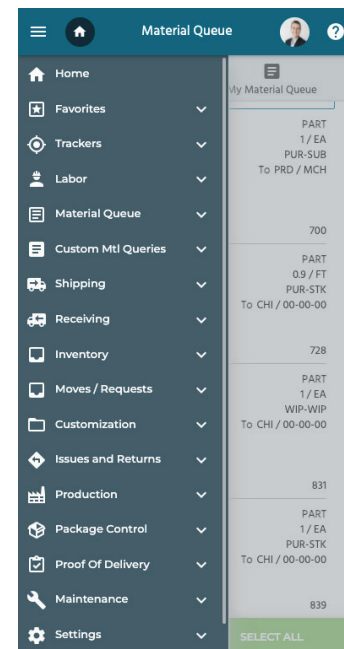

Deploys seamlessly, setup in minutes and highly configurable

Configurable to a company, site, warehouse team or user level

Optimizes workflow whilst improving efficiency and increased accuracy

Highlights

- Settings scope allows you to configure the application at a company, site, warehouse team or user level.
- Complex sorting and filtering options.
- Configurable scan validation at Part, Lot, bin and PCID level.
- Barcode templates allow you to map barcode components to fields in app for supported devices.
- Automated workflows, triggered by scan events.
- Support for BPM forms.
- Quick and precise scanning capabilities.
- Supports barcoded multiple units of measure.
- Create, view, and manage virtual Phantom Packs to better organize your outbound shipments.
- Custom material queries allowing you to create custom filtered and sorted queues including menus and favorites.
- Real-time integration with Epicor Kinetic ERP, making inventory and warehouse organization more intuitive and accessible than ever.

Easy to Deploy:

Instant setup. Ready straight out of the box in minutes. Configurable to every company, site, team, and user...

Boost Productivity: Handheld devices for on-the-go reliable data collection. Eliminate unnecessary walks to workstations.

Enhanced Accuracy: Use barcode and QR scanning to slash human errors, boosting productivity and revenue.

Real-Time Visibility: Live inventory updates provide accurate insights into stock levels, locations, and statuses, eliminating the need for calls or physical checks.

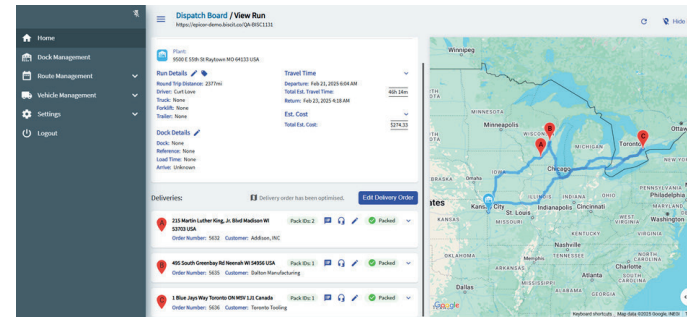

Cost Efficiency: Reduce inventory costs and free up working capital.

Seamless Traceability: Effortlessly track serial and lot-controlled products at every stage with barcode scanning.

Superior Customer Service: Minimize errors and speed up delivery, ensuring orders are complete and on time. Strengthen customer relationships and secure a competitive advantage.

BISCIT Delivery Planning

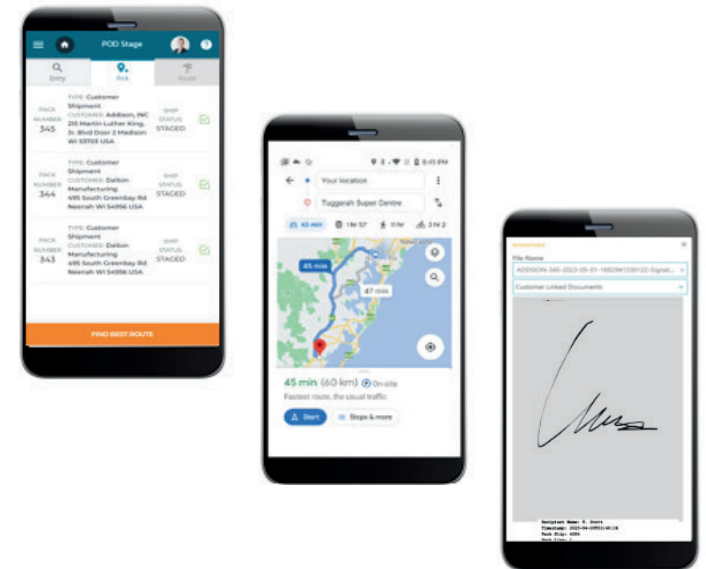

BISCIT Delivery Planning (BDP) allows your organisation to Plan, Adapt and Deliver on time. BDP provides real time visibility of What needs to Where, When from Order to Shipment.

Features

- Full visibility and control over delivery planning.
- Drag-and-drop interface for quick rescheduling of deliveries.
- Efficient route optimization with integrated map view.
- Capability to adjust routes manually.
- Integrated with EKW via the delivery staging functionality.
- Streamline outbound shipments with smart dock scheduling.
- Reduce driver wait time.
- End-to-end customer order visibility from Epicor Kinetic through the entire suite of BISCIT Warehouse products, leading to efficient and timely customer communications.
- Embedded rather than integrated in Kinetic, seamlessly extending your Epicor environment, whilst allowing you to leverage your favourite Epicor tools such as dashboards and BAQ's.

Proof of Delivery

BISCIT POD effortlessly tracks deliveries via real-time digital signatures and photos, allowing for additional documentation to ensure a comprehensive delivery record. POD enables logistics teams to conduct quick, accurate, and paperless deliveries.

Return Material Authorisation (RMA): Efficient return workflows by capturing critical return information at the point of return. Users can document returned items with photos, notes, and digital confirmation, all synced directly with Epicor's RMA module, ensuring accurate, traceable, and hassle-free returns.

Eliminates Paperwork: Streamlines deliveries with digital proof, including signatures and photos, integrated directly with Epicor Kinetic ERP.

Real-Time Kinetic Connectivity: Boosts productivity and accuracy through real-time connectivity to your Epicor environment.

User-Friendly: Features an intuitive design based on the Kinetic Design System.

Also available in POD Lite.
