

Epicor Kinetic Warehouse

Prepare your warehouse and shop floor operations for a new era of productivity with the industry leading innovation of Epicor Kinetic Warehouse (EKW) - powered by Biscit.

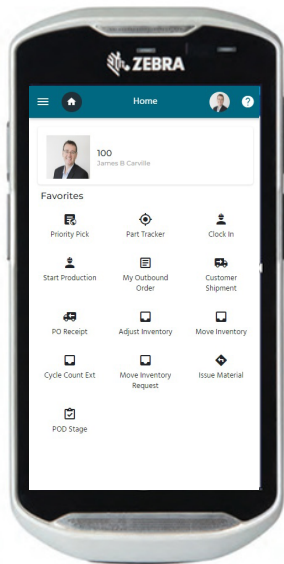

Fast and Accurate Scanning

Epicor Kinetic Warehouse is the next generation handheld application, which is completely integrated with Kinetic. It offers a modern, intuitive user interface for warehouse and distribution functions.

Epicor Kinetic Warehouse optimizes workflow for fast and accurate scanning, improves time to process transactions, increases accuracy, and reduces errors. It is compatible with the latest scanning devices running on Android® 6.0.1 or higher from Honeywell® and Zebra®. Simply download the application from the Google Play™ store into your device and start using it with minimal set up.

Pre-requisites

Epicor® ERP 10.2.400 or higher

Epicor Kinetic warehouse application provides a modern and intuitive user experience.

Features

Receiving

Provides complete functionality to process an inbound container or purchase order, as well as intercompany and transfer order receipts. It provides users with effective and efficient serial and lot processing and multiple UOM scanning. Users can search for all open PO's for a part by scanning the parts barcode.

Kinetic

Benefits

Modern and intuitive application

Complex sort and filter options

Part level validation

Bin level validation

Configurable scan validation

Shortcut to favorites

Automated work flows triggered by scan events

Paperless: Capture signatures and photographic proof of delivery

Delivery Route Optimization and Navigation with Google Maps™ integration

Process an inbound container or purchase order, as well as intercompany and transfer order receipts

Manage all your PCID needs including build, split and merging

Material Management

Provides core warehousing functions allowing users to imitate adjustments and movements from the warehouse floor. Offers an increased efficiency with cycle counts and stock takes. Enables efficient entry with automated workflows triggered by scan events.

Material Queue

Users can efficiently pick items assigned to their queue, grab items from the available queue, or return items back to the queue. Users can select an outbound order and select all material queue transactions related to the order, to the user's queue. Advance sort and filter functionality allows users to save to a named query and dynamically add to the sub menu. Unpicking sales or transfer orders functionality is also included.

Shipping

Scan pick validation option included. Process outbound shipments direct from the device. Functions include creating Master Packs and standard Pick Lists for customers not licensed for Advanced Material Management (AMM).

Trackers

Trackers help the shop/warehouse users in completing their daily routine.

Powered by BISCIT

Since its establishment in 2002, BISCIT has formed a strong relationship with Epicor and as a certified Partner are proud experts in delivering successful Kinetic projects Australia wide and overseas. BISCIT specializes in Kinetic services to deliver flexible, comprehensive and value-driven business solutions.

EPICOR

We're here for the hard-working businesses that keep the world turning. They're the companies who make, deliver, and sell the things we all need. They trust Epicor to help them do business better. Their industries are our industries, and we understand them better than anyone. By working hand-in-hand with our customers, we get to know their business almost as well as they do. Our innovative solution sets are carefully curated to fit their needs, and built to respond flexibly to their fast-changing reality. We accelerate every customer's ambitions, whether to grow and transform, or simply become more productive and effective. That's what makes us the essential partners for the world's most essential businesses.
